Education

University of Texas at Austin / <i>Austin, TX, USA</i> M.S. in Computer Science	Jan 2026 – May 2029
Arizona State University / <i>Tempe, AZ, USA</i> - B.S. in Computer Science Summa Cum Laude - GPA: 3.83 Dean's List Spring 2024, Fall 2024, Spring 2025, Fall 2025	Aug 2020 – Dec 2025
Community College of The Air Force / <i>Montgomery, AL, USA</i> A.A.S. in Aviation Maintenance Technology	Jul 2009 – May 2014

Open Source Contributions

Job Sourcerer / Video / Link / <i>A centralized job application platform</i> <i>JavaScript TypeScript React Node.js Drizzle ORM PostgreSQL TailwindCSS Git CI/CD</i> - Designed, developed, tested, and debugged a cross-browser web application and structured data management - Collaborated with team members to translate user requirements into functional specifications and implemented enhancements based on user feedback - Built and maintained modular React components with responsive layouts, ensuring compatibility across Chrome and Firefox - Implemented automated CI/CD pipelines using GitHub Actions, improving release reliability and reducing regression risk - Developed and maintained structured data models using SQL-backed storage, enabling filtering, reporting, and analytics - Authored technical documentation including developer setup instructions and user guides, detailing system architecture, data flows, and extension lifecycle behavior - Provided ongoing maintenance and feature enhancements across multiple releases	Jan 2025 – Dec 2025
G8 Medical Technology / Link / <i>Medical App</i> <i>Java JavaFX SQLite Git</i> - Developed and maintained a medical software application aligned with healthcare-related workflows - Collaborated with a six-person development team to implement features based on documented requirements - Assisted in debugging and resolving functional defects across multiple modules - Coordinated code integration efforts, completing 37 successful merges to ensure stable delivery - Contributed to project documentation and ensured all functional requirements were delivered on schedule	Jan 2024 – Apr 2024
Super Productivity / Link / <i>Productivity App</i> <i>JavaScript AngularJS SCSS Git</i> - Debugged production issues in a large-scale AngularJS application used by thousands of users - Identified regression sources using git bisect, isolating root causes efficiently - Implemented UI fixes and enhancements while maintaining existing application behavior - Collaborated with maintainers through code reviews and documentation to ensure long-term maintainability	Apr 2022 – Jan 2024

Personal Projects

Applied Stylometry / Video / <i>Data Science Report</i> <i>Python pandas NumPy scikit-learn NLP TF-IDF PCA SciPy Matplotlib Plotly</i> - Applied stylometry and NLP techniques to analyze authorship signals across multiple text corpora using TF-IDF, character n-grams, and sentence-level features - Built an end-to-end text analysis pipeline in Python, including HTML parsing, text normalization, feature extraction, and exploratory visualization - Reduced high-dimensional linguistic feature spaces using PCA and visualized clustering behavior to compare content-based vs style-based representations - Evaluated methodological limitations of stylometry on short-form texts, demonstrating how data volume and shared background can confound authorship attribution	Nov 2025 – Dec 2025
--	---------------------

Other Experience

Senior Aircraft Technician / <i>Lockheed Martin, Balad AB, Iraq</i> <i>Held active secret security clearance</i>	Dec 2017 – Jan 2020
--	---------------------

Technical Skills

- HTML/CSS, SCSS, Java, JavaScript, TypeScript, Bash, SQLite, C, C++, Lisp
- React.js, Node.js, Next.js, Vite.js, Webpack, JavaFX
- Git, VSCode, Neovim
- Storybook.js, Firebase, Jest, TailwindCSS, React Query, Playwright, lodash
