SEP 2009 - JAN 2010 (4 Months), 2A313B

OCCUPATION DESCRIPTION FROM SERVICE FILE FOR: 2A373

(Description dates OCT 2007 - JAN 2017)

2.1. Services aircraft. Performs end-of-runway, ground handling postflight, preflight, thru-flight, special inspections and phase inspections. Performs sortie generation operations and hot pit refuels. Advises on problems maintaining, servicing, and inspecting aircraft and related aerospace equipment. Uses conventional or automated technical data to diagnose and solve maintenance problems on aircraft systems. Interprets and advises on maintenance procedures and policies to repair aircraft and related equipment. 2.2. Troubleshoots and maintains aircraft engines, hydraulic, and other related systems, structures, components, and related equipment. Removes and installs aircraft and engine components. Conducts functional tests of repaired engines, components, and systems. Adjusts, aligns, and rigs aircraft systems. Supervises and performs aircraft jacking, lifting, and towing operations. 2.3. Inspects aircraft structures, engines, systems, components, and related systems. Supervises and performs aircraft, engine and component inspections. Interprets inspection findings and determines adequacy of corrective actions. Inspects and checks components for clearances, tolerances, proper installation, and operation. Inspects and operates powered and nonpowered aerospace ground equipment. Inspects and identifies aircraft corrosion for prevention and repair. Reviews maintenance forms, aircraft records, automated maintenance data systems, and historical reports to ensure complete documentation. Inventories and maintains aircraft equipment. 2.4. Performs flight chief, production superintendent, expeditor, crew chief, repair and reclamation, and maintenance support functions. Coordinates maintenance plans and schedules to meet operational commitments. Supervises and assists in launching and recovering aircraft. Reviews maintenance data collection summaries to determine trends and production effectiveness. Performs crash recovery duties. Performs staff and supervisory management functions.

Maintains tactical aircraft, support equipment, and forms and records. Performs and supervises flight chief, expeditor, crew chief, repair and reclamation, quality assurance, and maintenance support functions.

2. Duties and Responsibilities:

2.1. Services aircraft. Performs end-of-runway, postflight, preflight, thru-flight, special inspections and phase inspections. Performs sortie generation operations and hot pit refuels. Advises on problems maintaining, servicing, and inspecting aircraft and related aerospace equipment. Uses conventional or automated technical data to diagnose and solve maintenance problems on aircraft systems. MILITARY TRAINING: JAN 2015

AIR FORCE COURSE: J3AAR2AXXX 048A, CRASHED, DAMAGED, DISABLED AIRCRAFT RECOVERY (CDDAR)

LENGTH: 1 Week, 2 Days.

COURSE DESCRIPTION FROM SERVICE COURSE FILE:

(Description dates JUL 2014 - DEC 2014)

NOTE: All objectives of course must be completed to receive a certificate. Students affected by furlough must work out details with home units prior to attending the course. No furlough days may be taken during the course and will result in the student not completing the course. This course is intended for those personnel that have been assigned to the base Crash, Damaged, or Disabled Aircraft Recovery (CDDAR) program IAW AFI21-101. This course will train students on the basics of aircraft crash recovery. The course is not intended to cover specific unit programs or assigned aircraft. Students will be trained on the procedures for inspecting recovery equipment, lifting a fighter aircraft utilizing the dedicated sling method, returning a heavy aircraft to a hardened surface (debag), belly band lift of a heavy aircraft, and lifting a heavy aircraft with air bags. In addition to lifting, students will be trained on composite material response and handling procedures. The CDDAR course will be conducted at a location geographically separated from Sheppard AFB. Students will be in a secured area and will be bussed each day to and from the training location. Students are not permitted to drive POVs or GOVs to the training site. Once students are in the secured area, they will not be allowed to leave except for emergencies. Students may purchase hot meals (\$4.60 from DFAC) at the training location, or they may bring a bagged lunch. Minimal change is available from the DFAC. Please bring exact change or small denominations of cash to purchase a hot meal. Sunscreen/Sun block is recommended as most of the course will be conducted outdoors. PT will be conducted three times per week, weather/duty permitting. FIP documentation is not required. The UOD will be the ABU for the duration of the course, uniforms must be serviceable and worn IAW AFI 36-2903. Blues are NOT REQUIRED for this course. Reporting Instructions: Students will report on the first day of training to building 1040, room D119 at 0730 on the first day. TRANSPORTATION: Sheppard AFB has a base shuttle service for ON-BASE transportation. The shuttle schedule may be obtained from the Sheppard Inn (VAQ/VOQ). Students may also call DSN 736-1843 COM 940-676-1843 and request a base taxi. The Sheppard AFB military taxi operates 0400-0100, Monday through Friday, and 0800-2300 on weekends and holidays. The taxi provides a quick-response, point-to-point service to personnel performing official government business and is authorized for use by active duty, DoD and contractor personnel on official government business. Services may be obtained by calling the Vehicle Dispatch Operations at 940-676-1843. Services are limited to Sheppard AFB (SAFBI 24-303).
