Education

University of Texas at Austin <i>Austin, TX, USA</i>	Jan 2026 – May 2029
M.S. in Computer Science with a focus on Machine Learning/AI.	
Arizona State University <i>Tempe, AZ, USA</i>	Aug 2020 – Dec 2025
- B.S. in Computer Science Summa Cum Laude - GPA: 3.83 Dean's List Spring 2024, Fall 2024, Spring 2025, Fall 2025	
Community College of The Air Force <i>Montgomery, AL, USA</i>	Jul 2009 – May 2014
A.A.S. in Aviation Maintenance Technology	

Military Service

Active Duty Air Force	Jul 2009 – Jul 2016
Air National Guard	Jul 2016 – Mar 2021

Open Source Contributions

Job Sourcerer Video Link <i>A centralized job application platform</i>	Jan 2025 – Dec 2025
Drizzle ORM PGLite PostgreSQL React Shadcn TailwindCSS TypeScript WXT	
- Setup CD/CI pipeline utilizing GitHub Actions, enabling early regression detection and single click deployment to Firefox and Chrome Extension stores - Handcrafted client side ATS algorithm utilizing cosine of similarity, achieved resume to job description matching within 5% of paid service at zero cost - Designed and built a cross-browser job application management extension (Chrome & Firefox) that automates job tracking, resume management, and application status workflows - Implemented browser extension architecture using background, content, and popup scripts to extract job data from third-party sites (e.g., Handshake) and persist structured records locally - Developed a client-side data layer using Drizzle ORM with a PGLite-backed database to manage jobs, resumes, and derived analytics without a backend dependency - Built a responsive dashboard with React, TypeScript, and Tailwind, supporting bulk actions, filtering, resume job linking, and real-time stat computation	
G8 Medical Technology Link <i>Medical App</i>	Jan 2024 – Apr 2024
Java JavaFX SQLite	
- Broke six-person team into three feature focused subteams, reduced crosstalk, increased dev momentum - Performed 37 merges, instrumental in synchronizing six-person team - Delivered all required specifications on time	
Super Productivity Link <i>Productivity App</i>	Apr 2022 – Jan 2024
SCSS Angular.js	
- ID'd regression bug by utilizing git bisect - Corrected UI issue by isolating problematic SCSS, resulting change merged into production branch	

Personal Projects

Applied Stylometry Video <i>Data Science Report</i>	Nov 2025 – Dec 2025
Python pandas NumPy scikit-learn NLP TF-IDF PCA SciPy Matplotlib Plotly	
- Applied stylometry and NLP techniques to analyze authorship signals across multiple text corpora using TF-IDF, character n-grams, and sentence-level features - Built an end-to-end text analysis pipeline in Python, including HTML parsing, text normalization, feature extraction, and exploratory visualization - Reduced high-dimensional linguistic feature spaces using PCA and visualized clustering behavior to compare content-based vs style-based representations - Evaluated methodological limitations of stylometry on short-form texts, demonstrating how data volume and shared background can confound authorship attribution	
Polyfill Pwn Protector Link <i>Web Security Browser Extension</i>	Jun 2024 – Jun 2024
JSON JavaScript	
- Protects users against 380K sites infected with polyfill attack by blocking and replacing infected polyfill domain - Published three days after attack	

Other Experience

Senior Aircraft Technician <i>Lockheed Martin, Balad AB, Iraq</i>	Dec 2017 – Jan 2020
<i>Held active secret security clearance</i>
