

Branden Palmer

205-353-1613 / brandenpalmer08@gmail.com / Remlap, AL 35133

Experience

Senior Aircraft Technician / *Lockheed Martin, Balad AB, Iraq* **Dec 2017 – Jan 2020**

- Performed scheduled and unscheduled maintenance on F-16 aircraft, ensuring mission readiness and compliance with technical orders.
- Diagnosed and resolved complex mechanical, hydraulic, electrical, and avionics discrepancies under strict time constraints.
- Conducted pre-flight, thru-flight, and post-flight inspections to verify aircraft airworthiness and safety.
- Managed and documented maintenance actions using Air Force maintenance information systems.
- Coordinated with avionics, propulsion, and munitions teams to resolve cross-system issues efficiently.
- Reduced repeat maintenance discrepancies by implementing improved troubleshooting and documentation practices.
- Supported flight-critical aircraft systems in deployed operational environments
- Executed maintenance, inspection, and corrective actions in accordance with technical orders and quality standards
- Collaborated with engineering, QA, and production teams to resolve non-conformances and return aircraft to service
- Developed strong discipline in safety, documentation, and process compliance under mission-critical constraints

Education

Community College of The Air Force / *Montgomery, AL, USA* **Jul 2009 – May 2014**

- A.A.S. in Aviation Maintenance Technology

Personal Software Projects

Job Sourcerer / [Video](#) / [Link](#) / *A centralized job application platform* **Jan 2025 – Dec 2025**

Drizzle ORM PGLite PostgreSQL React Shadcn TailwindCSS TypeScript WXT

- Designed and implemented data analysis pipelines to evaluate resume-to-job matching using vector similarity techniques
- Conducted trade studies comparing matching methodologies and optimized scoring accuracy to within 5% of paid ATS tools
- Built tooling to extract, normalize, and validate structured data from third-party systems
- Developed workflows emphasizing repeatability, reliability, and data integrity
- Worked in a multi-developer team environment using CI/CD, code reviews, and regression testing

G8 Medical Technology / [Link](#) / *Medical App* **Jan 2024 – Apr 2024**

Java JavaFX SQLite

- Coordinated work across a six-person engineering team using feature-based task decomposition
- Supported integration, testing, and delivery of all required system functionality
- Ensured consistent documentation and version control practices
- Assisted with verification of requirements and final system validation

Applied Stylometry / [Video](#) / *Data Science Report* **Nov 2025 – Dec 2025**

Python pandas NumPy scikit-learn NLP TF-IDF PCA SciPy Matplotlib Plotly

- Performed statistical and exploratory data analysis on large text datasets
- Built reproducible analysis workflows including data ingestion, normalization, dimensionality reduction (PCA), and visualization
- Evaluated methodological limitations and documented assumptions, constraints, and sources of error
- Presented findings using clear visualizations and written technical summaries

Polyfill Pwn Protector / [Link](#) / *Web Security Browser Extension* **Jun 2024 – Jun 2024**

JSON JavaScript

- Protects users against 380K sites infected with polyfill attack by blocking and replacing infected polyfill domain
- Published three days after attack

Super Productivity / [Link](#) / *Productivity App* **Apr 2022 – Jan 2024**

SCSS Angular.js

- ID'd regression bug by utilizing git bisect
- Corrected UI issue by isolating problematic SCSS, resulting change merged into production branch
